

Important Safety Guidelines

Safety is everyone's responsibility. Tusc Supply LLC's (hereinafter the "Company") equipment is designed and manufactured with the user in mind. The care that goes into each piece of equipment, however, cannot offset carelessness on the part of the user. Follow these safety guidelines in order to help prevent injury and to reduce unnecessary risk.

1. **Competent Person.** Scaffolds must be erected, used, moved, and disassembled only under the direction of a Competent Person. The customer is responsible for following any and all applicable federal and state occupational safety and health laws, rules, regulations and ordinances in addition to applicable city, county or local codes and specific rules with regard to Competent Person and inspection requirements for scaffolds.
2. **Modification.** Any modification or relocation of scaffolding equipment and its components by the customer, contractor or any subcontractor using the scaffold, is done solely at the customer's risk and should comply with, and according to, any and all federal and/or state occupational safety and health laws, rules, and regulations, in addition to applicable city, county, or local codes. The equipment shall only be used for the purposes for which it was designed.
3. **Training.** The customer is responsible for providing any and all required scaffolding training for its employees and any other users of scaffolding equipment, other than the employees of the Company and any of the Company's subcontractors.
4. **Hazardous Materials.** Please notify the Company of the potential for exposure of either the Company's employees or the Company's equipment to any hazardous materials including, but not limited to, asbestos, lead, arsenic, chemicals, and flammable materials. The Company and/or the customer may be required to perform industrial hygiene monitoring to measure potential exposure to such materials.
5. **Confined Space.** Please notify the Company if any of the Company's employees will be working in a confined space and inform the Company whether the confined space is permit-required. According to federal and state occupational safety and health laws, the customer is responsible for providing any and all required confined space training for its employees and any other users of scaffolding equipment in the confined space, other than the employees of the Company and any of the Company's subcontractors.
6. **Lock-out/Tag-out.** According to federal and state occupational safety and health laws, the customer is responsible for ensuring that all mechanical equipment, electrical circuits, or vessels containing chemicals or pressurized fluids which are located in the immediate vicinity of the work areas are de-energized or rendered inoperative prior to work, and that proper tags and/or locks are attached to all points where such equipment can be energized.
7. **Special Equipment.** Please notify the Company if any specialized equipment including, but not limited to, special tools, lighting, or protective equipment is required for this project prior to the Company's commencement of work on the project.
8. **Accident Notification.** Please notify the Company immediately of any accident involving the equipment and/or any accident – causing injury, death or property damage that is related to, or is alleged to be related to and/or caused by, the equipment in any way.

Understanding and following these safety guidelines will improve safety for all workers on the jobsite. If there are questions regarding these provisions, or if you need assistance in obtaining additional training for your employees, please contact a Company representative immediately.
